

Muhammad Nurtyas Fawwaz

Software Developer

Jakarta, Indonesia | +6287796548343 | mn.fawwaz99@gmail.com | [LinkedIn](#) | [Github](#) | [WhatsApp](#)

SUMMARY

My career began as IT support for a company, but I always want to code. I made a strategic pivot from hardware to programming language, completing an intensive full-stack program at Hacktiv8 to formally fuel a lifelong passion. Now, I channel that same focus and determination into programming, specializing in creating engaging and intuitive experiences for both web and mobile platforms.

EDUCATION

Hacktiv8 (transkrip) <i>Full Stack JavaScript Immersive Program</i>	Jakarta, Indonesia <i>August 2025 – November 2025</i>
---	---

Universitas Gunadarma <i>Sistem Informasi (GPA 3.32/4.00)</i>	Jakarta, Indonesia <i>2017 – 2021</i>
---	---

WORK EXPERIENCE

PT. Karsa Buana Lestari <i>IT Support</i>	Jakarta, Indonesia <i>January 2021 – August 2025</i>
---	--

- Handled 3 separate office network
- Make a program to handle submit form for office purposes
- Handle service for hardware devices on company

SKILLS

Language: JavaScript

Front End: React JS, Redux, React Native, HTML & CSS, Apollo Client, Next js

Back End: Node JS, Express, Sequelize, PostgreSQL, GraphQL, Apollo Server, MongoDB, Redis, Rest API, Next js

PROJECTS

Website E-Shop	<i>November 2025</i>
---------------------------------------	----------------------

A full-stack e-commerce platform specializing in table furniture, built with a focus on performance and user experience. The project leveraged Next.js for a seamless integration of frontend and backend, implementing both client-side and server-side rendering to ensure fast load times and effective search engine visibility

Tech stack: React.js, Next.js, MongoDB, Vercel

GameWorks: Your AI Game Curator	<i>October 2025</i>
--	---------------------

GameWorks solves a common problem for gamers: "What should I play next?" This application leverages the power of AI to provide personalized game recommendations. Users can sign in seamlessly with their Google account, ask the AI for suggestions based on their preferences, and save their favorite recommendations to a personal list for later.

Tech stack: AWS, PostgreSQL, Firebase (Auth & Hosting), Gemini AI, RAWG API, React/Node.js, google Auth, ExpressJs, Redux, Sequelize, Rest API

Facebook clone phone App	<i>November 2025</i>
---	----------------------

A full-featured mobile application that replicates the core experience of the Facebook social media platform. Built with React Native and Expo for seamless performance on both iOS and Android, this project demonstrates the ability to architect complex, user-centric mobile applications.

Tech stack: React Native, Expo, Apollo server, MonggoDB, AWS, Cloudflare, Redis
